Microchannel Condenser Coils Standard on EnergyPack® and VHC Product Lines

Saskatoon, SK (December 20, 2012) – Venmar CES is pleased to announce that all of our air cooled refrigeration packages now incorporate brazed aluminum heat exchanger condenser coils for our EnergyPack, VHC and VHC-72 product lines.

Microchannel heat exchangers have numerous benefits which include, but are not limited to:

- Superior performance and efficiency
- Smaller size and weight
- Reduced refrigerant charge
- Improved durability and serviceability
- Improved corrosion protection

For more information on the benefits of using microchannel condenser coils in Venmar CES energy recovery equipment, please contact your local [representative](#).

About Venmar CES

Since 1952, Venmar CES has been committed to the philosophy of designing products that are engineered for reliability and long life. As North America's leading manufacturer of ventilation products, we offer our customers a wide range of high quality HVAC solutions. From cost-effective commercial ventilation to custom-designed Dedicated Outdoor Air Systems (DOAS), we provide our customers with the most efficient heating, ventilating, and cooling packages.
