### Product Safety Upgrade Program

**Saskatoon, SK (June 19, 2008)** – It has come to the attention of Venmar CES that an unlikely series of circumstances could lead to a motor overheating in specific Heat Recovery Ventilator (HRV) Light Commercial models that may result in a potential fire hazard. These units fully comply with all UL and CSA standards. They are already safeguarded by circuit protection under the National Electric Code and by thermal protectors in the motors. Venmar CES will arrange for a qualified field technician to upgrade the units at no charge for the customer.

The Product Safety Upgrade Program is a preventive measure that Venmar CES takes today to ensure that all of its customers have total peace of mind regarding their product safety.

Only specific Light Commercial models produced between 1991 and 2007 are affected by this Product Safety Upgrade Program. This preventive measure does not involve HRVs manufactured before 1991 or after 2007, as well as other models not mentioned below. The following Light Commercial ventilation unit models are involved in this Product Safety Upgrade Program:

- Flair brand: 150/300 Compact, 300/600 Compact
- Venmar CES: 6LC, HRV600i, 12LC, HRV1200i
- PrepAir: PrepAir600i, PrepAir1200i
- VänEE: 6LC, 12LC
- Carrier: 62AA-064-101XX, 62AA-127-101XX
- York: V1CRD07A01, V1CRD13A01
- Heil: VRC 300 Compact, VRC 600 Compact
- Aston: HRV600i, HRV1200i
- Broan: HRV650, HRV1150
- Venmate: 600H, 1200H

If you have one of the above listed models, manufactured between 1991 and 2007, immediately turn off the unit and disconnect it from the power source. [Contact Venmar CES](#) to validate if your unit is included in the Product Safety Upgrade Program.

### About Venmar CES

Venmar CES is well known as a pioneer in commercial air-to-air energy recovery ventilation.
