Venmar CES Introduces the New V-Cube™

Saskatoon, SK (May 2, 2012) – Venmar CES is pleased to announce the release of the new V-Cube product line, available through all Mammoth representatives. Building on an already solid foundation, with a reputation for its compact footprint and quiet operation, the V-Cube self-contained system offers all of the benefits of previous iterations, such as:

- Sizing flexibility, with capacity ranging from 9 to 150 tons and airflow from 4,000 to 40,000 cfm
- Knock-down construction, to easily demount systems, making it ideal for tight spaces
- EPIC™ System controls

In addition, the V-Cube line has been enhanced to include several new features that further increase the flexibility of this already versatile product:

- 3-inch Integrated Thermal Break Framing™ (ITF) system and floor membrane
- FANWALL TECHNOLOGY®
- Six new cabinet designs to compliment the already formidable array of sizes

Visit the Mammoth website to read the updated [product literature](#) and learn more about the new [V-Cube](#).
